Description

In annotated "Python Whirlwind Tour.txt", we have seen some terrible looking tagged keyphrases such as: generally, functionally, etc.
We need to make changes in the BR3_IR3_tagger.py to make sure such KPs are eliminated using their POS tag value. Test your changes with the following datasets:
1. Python Whirlwind Tour.txt
2. Python Tutorial.txt
3. Python 3 - Library Reference.txt

In case elimination of some of the keyphrases is undesirable, find a common word threshold that might help us save them from getting discarded.
For running "Python 3 - Library Reference.txt", you can use master_cands_0.pkl from this link -
