

RK-A - Bug #1744

Task # 1726 (Resolved): Handling cases of bad header variants like "representation"

Bug # 1743 (Resolved): Checking singular and plural forms of the tmp_var from variations_in_common_section_words in common words list

Calculating the fullness_ratio of the header variants to decide a threshold for removal of header variants

Description

Using the original headers, calculate the fullness_ratio of the header variants wrt the original headers to see if we can find any underlying pattern to remove bad KPs.

E.g.

original header: at object creation time, using keyword arguments

tmp_var: keyword

fullness_ratio is 0.14285

Test this idea for Lib Ref book, C-API book, Whirlwind book & Lang Ref book.
