Bug # 1742 (Resolved): Preventing removal of KPs that are getting removed due to new/latest changes

Skip all the KPs starting with words within CW 300

Description			
Upon making changes in the generate_candidates function, we saw that a lot of KPs were getting tagged with the starting word as a stop word or a common generic word.			
To make sure that the tagged KP does not start with a stopword/generic words, we can add a filter of common words 300 on the first word of the KP. These common words include "using", "a", "the", "with", etc.
