#### Description

It was observed in the C-API book that header variants are being generated inappropriately for some headers like "int (getbufferproc) (pyobject\xa0, py\_buffer\xa0\*, int)". We need to find the reason for the same and make sure that the correct variants are generated.

For e.g.

**HEADER -> Current Header Variant -> Expected Header Variant**

int (getbufferproc) (pyobject\xa0, py\_buffer\xa0\*, int) -> int -> getbufferproc

Adding a screenshot of all the headers for which wrong header variants are being generated.
