It seems like that the ones that don't have a issue has a div tag with class=hihighlight just above the pre tag

In all the three links, there is a space (or space + nextLine) after the opening

tag.
so, it is like `<pre> somecontentHere</pre>`
making it like `<pre>somecontentHere</pre>` , solves the issue.

steps to check in chrome,
1. Click on the problematic pre tag after opening chrome inspect element tools,
2. Use Edit as HTML.
3. Remove the space after the opening of `<pre>` tag, this will remove top space.
