Description			
<p>In Lib Ref, tagging of KP "configuration" does not make sense. The linked document is completely out-of-context. We should remove this KP. If not possible to remove the KP, we should reduce the sim_score to make sure it does not get tagged.</p> <p>https://edutestdev-240612.appspot.com/document/python-3-library-reference-pl-2021-10-05-152404.652689-spl/loader?documentURL=10015%2Fprd%2F3%2Flibrary%2Fcontextvars-asyncio-support-863.html</p> <p>The screenshot also attached.</p>
