

RK-A - Task #2221

Treat singular and plural forms of ANPs as duplicates

03/28/2022 07:34 AM - Ram Kordale

Status:	Rejected	Start date:	03/28/2022
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	P1	Spent time:	0.00 hour

Description

For example, consider Python 3 Library Reference > Python Runtime Services > dataclasses — Data Classes > Module contents

We have KPs 'classes' and 'class'

We should consider them both as duplicates.

Today, both are 1KPs. So, in the context of ticket 2223, 'class' will not be marked as a 1KP because it is a duplicate of 'classes' which is already marked as a 1KP and it is within 250 words proximity.

Also, in the context of ticket 2222, 'class' will be given a score of BROWN_SCORE (= min(1.0, BROWN_SCORE)).

History
