Null pointer exception occurred while parsing the 21.txt			

### History

#### #1 - 09/07/2022 02:03 PM - Venmuhilan B

- Status changed from New to In Progress

#### Reason

Exception occurred while parsing the 21.txt during resume Ingestion

In the 21.txt file, the first document has section name and l-url but not any other fields(usually this is used for heading and it will not have rank). During the resume, the previous document's rank is not present in the documentMarkers and the current document doesn't have the rank. When accessing the rank it causes the null pointer exception

#### #2 - 09/07/2022 02:04 PM - Venmuhilan B

- Status changed from In Progress to Resolved

- % Done changed from 0 to 100

#### Fix

Added a check for all the logs statements that is accessing the rank( i.e documentMarkers.get(rank).getData())
