Description			
Noticed on Sep 29th that Book with index name pytorch-python-api-ks23sep22 was stuck at id 2531 on Dev.			
Debugging showed that resumption logic has bugs.

Bug:

Scenario:

If the book has 6 documents.

Move the documents to tempContent

All the 6 documents are saved to tempContent and tempContentSupplement. Now, the lastAddedDocumentId will be <documentProcessingId>-6.

Move the documents to content

In the moveTempContentDataToDSAndES() method, it will get lastAddedDocumentId as <documentProcessingId>-6. This lastAddedDocumentId is 6 because it is last updated to tempContent and not the content.

then List<tempDocumentKeys>(sorted in descending order) will be processed 1 by 1. Here, the tempDocument will be <documentProcessingId>-6. As both lastAddedDocumentId and tempDocument Id is equal, it will not save/update that document to content kind
