<b>Description</b>			
Today, we show the closed extension under some conditions.			
In the closed state, under the arrow and at the top of the purple area, add a X button. Clicking on this should stop showing the extension. If the user reloads this page, it is fine to show. Let the colour of X be bold black.			
In the open state, show the X in the rightmost part of the white band (basically to the right of the phrase 'Video Hyperlinker').			
As always, do not use cookies of browser storage.			
Whenever the user does this, a searchable line should be recorded in the server logs.			
Of course, if user goes to other videos/pages, show as per current rules.
