Description			
Change is more urgently required in js snippet: - change title from "Video Hyperlinker" to "Omni Copilot" - remove "in the video" from "Want to know more about a term in the video?" - remove "in any video" from "Unfortunately, "blah blah" is not explained in any video by the author" - replace "Our AI could not find any terms in this video that have a good explanation in other videos." with "Our AI couldn't identify any terms in this content that have been explained well elsewhere." Is "video" used anywhere else? We are doing this because we want to use this for video and text.
