

RK-J - Task #3376

Optimizations in getPurpleLinks API implementation

01/16/2024 11:50 AM - Ram Kordale

Status:	Review	Start date:	01/16/2024
Priority:	Immediate	Due date:	
Assignee:	Venmuhilan B	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1-RK-J-1	Spent time:	0.00 hour
Description			
<p>1. If requestedOurl is not present in purpleLinksInfoExtFullCombined kind, check for the ourl in the content kind only if it is a youtube url or the url is supported page (means any of the aliases contains prefix of the requestedOurl).</p> <p>2. For getting the values for isCopilotOpenOnExit, delayBeforeFirstCopilotOpen, defaultOpen, ads, subject, CopilotLocation, we are making separate datastore call to documentProcessing kind. Instead: (a) dont make calls for unsupported URLs; return default values and (b) make only one datastore call to the documentProcessing kind to get these values.</p>
