#### Description

In <http://34.67.50.25/issues/3580>, we receive a thread id that is reused. We need to remember this even on reload and across sessions.

Store <model, index, thread\_id> in local storage and reuse it.

So, when user lands up on the page, check for thread id in local storage for the model and index and pass it to the call\_openai\_api GCF.

Note that page author provides model and index as parameters to the div.
