Description

1) **Theme Selector Reference Image** -

Refer the image linked above. The **bubbles** cutoff on the left/right indicate that the **bubbles** can be horizontally scrolled & more bubbles are available on the left/right side of the screen. There are only 3 rows of bubbles and multiple columns which can be horizontally scroll-able. This will be make sure the **Theme Selector Container** doesn't take too much space as compared to the actual **Chat Interface**. We have to implement this in our **Chat Interface UI**.

2) Post #3664 implementation, we will have to show " **chosen styles** " by default when the user clicks on the **Theme Button**. After implementing #1, we have to make sure that the default chosen styles are shown in the middle of the **Theme Selector Container** & should not be cutoff/hidden on left/right sides of the container.

3) This should for all laptop/tablet/mobile screens

4) for starters, TCs needed to covered ---
4.1) Chosen Themes > Unchosen Themes
4.2) Chosen Themes < Unchosen Themes
4.3) Chosen Themes === Unchosen Themes
4.4) Chosen Themes NOT present
4.5) Only Chosen Themes present
4.6) Either Chosen Themes or Unchosen Themes are present in low numbers such that more than -
4.6.1) 2 rows cannot be formed
4.6.2) more than 1 row cannot be formed
