

RK-A2 - Feature #3771

Clone the 'create detailed qna' colab with some changes

11/18/2024 12:31 PM - Ram Kordale

Status:	Closed	Start date:	11/18/2024
Priority:	Urgent	Due date:	
Assignee:	Ram Kordale	% Done:	100%
Category:		Estimated time:	0.65 hour
Target version:		Spent time:	0.00 hour
Description			
Changes are the following:			
I			
create a cell that reads prefix-question, suffix-question, prompt-5, prompt-10 from inputFile.txt			
II			
previously, prompt=question. now, please make prompt=concat(prefix-question, question, suffix-question)			
III			
stop execution if there are less than 3 steps in the detailed answer			
IV			
After getting detailed QNA with at least 3 steps:			
-while Answer field is wrong && numRetries < 5			
--prompt=prompt-5			
--call_openai(...)			
--prompt=prompt-10			
--call_openai(...)			
If this still fails, stop execution.			
In both cases where the execution is stopped, running the cell again should resume from the right place.			
Note: If prompt-10 is empty, then do not make the "prompt-10 call" since there is no meaning in making the call. In this case, the result from "prompt-5 call" should be used in the above while loop.
