Category:			**Estimated time:**	0.00 hour
Target version:			**Spent time:**	0.00 hour

Description

Suppose, the answer provided by the book is A and the one that AI provides after even the final attempt with "still wrong answer" prompt is B, we note it as failed. Instead, dont mark it as failed and treat it as success except:
-add A in a new field "original-answer" of 'styled answer' kind. In order to do this, you may need to add this new key value pair to the json as well.
-add B in the answer field
